

@ Cognizone you'll get involved with state-of-the-art technologies and innovative projects, but that's not all!

You'll be part of a fast-growing company.

You'll feel inspired by your colleagues who are fully dedicated to their jobs.

You'll work in a multi-national environment with colleagues from all over Europe.

Experienced IT Project Manager / Analyst

We are looking for a Project Manager / Analyst who is motivated to combine the art of managing projects with the art of analysing business requirements. You will be working with our team of Knowledge Engineers and Software Developers but also in close contact with our customers, both in the private and government sectors.

We would like you to have the following:

- ✓ Project management skills
 - Create, execute and revise project work plans to meet changing customer needs
 - Identify and schedule the appropriate resources to meet plan objectives
 - Manage the activities of the team members
 - Manage project change requests, in line with the scope and expectations
 - Communication skills to interact with clients and other stakeholders
 - Report project status and metrics to the management
 - Proven track-record of timely project delivery
 - Good knowledge of Descriptive statistics
 - Experience with project management tools (preferably Atlassian suite and MS Project)
 - Apply agile methodologies (mainly Kanban and Scrum)
 - Manage all phases of software development: analysis, development, testing, acceptance, documentation and deployment
- ✓ Analyst skills
 - Facilitate a discussion with the customers to elicit project requirements
 - Draw-out Functional and Non-functional requirements of software tools
 - Experience with UML/BPMN modelling (minimum Use case diagram modelling)
- ✓ General Skills
 - 6+ years of proven professional experience
 - Academic thinking and working level
 - Result oriented, detailed and focused, a flexible, hands-on team player
 - Excellent spoken and written command of the English language
 - Good spoken and written command of the French or Dutch language

It would make us smile if:

- ✓ You have knowledge of the dynamics of the European labour market
- ✓ Terms SKOS/RDF mean something to you
- ✓ You are actively interested in fields like the Internet of Things, Data Governance and Linked Open Data
- ✓ You are familiar with having an OWL as a "pet"

What we offer:

- ✓ Get involved with state-of-the-art technologies and innovative projects
- ✓ Be part of a fast-growing company
- ✓ A competitive salary including benefits
- ✓ Team building events under a shining sun

Company description:

Cognizone is a start-up of several ICT engineers, experienced in different computer science disciplines, working with data and semantics for the last 15 years, providing industrial strength solutions.

If the above makes sense to you, stop wasting your time and drop us your CV at jobs@cogni.zone
